Your IT/SAP

Consulting

Partner

Stango & Associates is a leading SAP and IT consulting firm. We work with IT organizations and government contractors nation-wide to ensure timely and cost-effective deployment and maintenance of their application software. We serve a few customers at a time, but we serve them well. We are selective in industries and projects we take on, so that we can remain very focused and responsive to your unique needs.

Since 1999, **Stango & Associates** has served as a reliable partner for our customers' SAP and IT implementation projects by enabling our clients to improve technology operations and support their development and deployment needs. We have been successful supporting a variety of clients ranging from start-up companies to well-established government contractors and Fortune 500 companies.
Mission and Focus

Our Mission is clear – to serve and support our clients' SAP and IT implementation plans through best-in-class people and practices. We focus on supporting SAP implementations, solution upgrades, maintenance and our client's general IT requirements. Our industry expertise includes DOD, Government, Pharmaceutical, Medical Devices and Financial Services. We constantly strive to serve our customers in a variety of industries and with the new IT challenges they face every day.

SAP Implementation Specialists

One of our primary practices is SAP implementation projects. We have developed one of the largest and most qualified team of SAP consultants in the country. Our SAP implementation consultants have an average of ten years of IT experience and seven years of SAP experience.

How Are We Different ?

- We are responsive, competitive and easy to do business with
- Our consultants are either US citizens or permanent residents and have excellent communication skills
- We have a dedicated practice focused on SAP implementation and expertise
- We have over ten years of successful track record
- We strive to understand the industries that we serve so that we can best meet their unique needs
- We understand the difference between a business partner and a vendor

We serve a few customers at a time, but we serve them well

We Are Uniquely Qualified

Our management team has extensive experience in IT industry consulting, recruiting, engineering and sales. Our team has experience working for and with organizations such as Boehringer Ingelheim, Boeing, Bristol-Myers Squibb, Computer Sciences Corporation (CSC), Hewlett-Packard, IBM, Johnson and Johnson, Lockheed Martin, Nike, Sanofi-Aventis, Sun Microsystems and UPS.

We carefully screen and assess all of our consultants and have firsthand knowledge of their skills and abilities. Our nation-wide talent pool continues to grow due to the large base of referrals from our existing consultants and clients, and the sizable network of partners that we team up with. All our consultants are either US citizens or permanent residents.

We have the ability to react quickly to our client requirements. Our agility coupled with the hands-on involvement of our management team allows us to complement your project team with unique skills and qualified consultants swiftly and at competitive rates.

Right team of consultants to help you complete your projects within your budget and time constraints

Stango & Associates is a leading IT staffing specialist, working with IT organizations and government contractors to facilitate placement of highly qualified information technology professionals.

Since 1999, **Stango & Associates** has been helping emerging and Fortune 500 companies identify and place the right candidates to help ensure their project completion within their budget and time constraints. From Software Developers and Network Engineers to Database Administrators and E-Commerce Specialists, we have the tools to locate the individuals you need.

Technical Understanding & Knowledge

Stango & Associates doesn't just fill vacancies – we help build companies. Thanks to our staff's extensive personal experience – from software development to sales expertise – we have developed a unique methodology to help you build a qualified team of IT professionals – with specific skills and technology expertise – to meet your business goals.

Our approach is based on defining not only the candidate requirements (i.e., the essential skill sets) but also the job specifications – what the position will entail and how it fits into your company's goals and culture. Our intimate understanding of the industry, coupled with our knowledge of your needs and our vast database of candidates, can help you achieve timely fulfillment of your projects.

We pride ourselves on submitting only those candidates who possess the skills and competencies to meet your personnel requisition.
